BRAKES

No.63/1

May 1963

TO: ALL ROOTES DEALERS

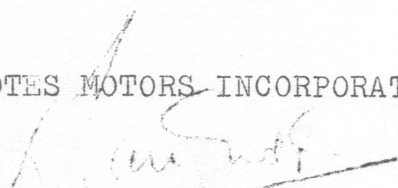

SUBJECT: HYDRAULIC BRAKE FLUID

MODEL: ALL LIGHT CAR RANGE AND HUMBER

Due to various state laws regarding the use of hydraulic brake fluid not up to SAE specifications, we have decided to carry in our parts stock Girling H.D. crimson brake fluid which exceeds SAE specifications 70R1 and 70R3, and is acceptable in all states.

It can be used safely in brake systems of all Rootes products, and is recommended by the Wholesale Service Department.
