SERVICE BULLETIN

ENGINE

No. 63/6

January 1963

TO: ALL ROOTES GROUP DEALERS

SUBJECT: SPARKING PLUGS

MODEL: HUMBER SUPER SNIPE III, SUNBEAM ALPINE II AND
SUNBEAM RAPIER IIIA

To avoid the possibility of plugs becoming fouled when owners use their cars predominately at low speeds, in traffic, or for short journeys, Champion No.5 plugs are now specified for the above models. These supersede the N.4 plugs previously fitted.

For prolonged high speed motoring, Champion N.3 plugs are recommended. These plugs are designed to give best results at higher working temperatures and to avoid the preignition which may occur if "hot" type plugs are used in engines operated near the limit of their performance.
