PAGE I OF I

AUGUST, 1964

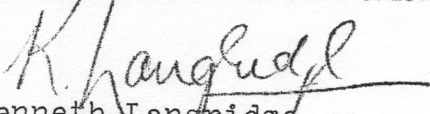

TO: ALL ROOTES GROUP DEALERS
MODEL: SUNBEAM TIGER '260'
SUBJECT: ENGINE DEGREASING (P.D.I.)

Prior to shipment of the Sunbeam 260, the engine compartment and ancillaries are sprayed with a lanolin based preservative. On no account should this be removed by steam cleaning.

The "lanolising" can be removed effectively by wiping with rag and in a few minutes, the engine unit, especially the chrome attachments, will have their normal lustre.

Will you please bring this to the attention of the Service Department cleaning personnel.
