JULY, 1965

TO: ALL ROOTES DEALERS
MODEL: LIGHT CAR RANGE
SUBJECT: ALL SYNCHROMESH GEARBOX BAULK
RING IDENTIFICATION

With the introduction of the all-synchromesh gearbox on the Light Car Range models, a new baulking ring with a different cone angle has been introduced.

It is essential that stocks of the earlier baulk ring are not mixed with the later stock, as it is physically possible to fit either type to both gearboxes.

For your guidance, the respective baulking rings can be identified as follows:-

Early type 3-speed synchromesh gearbox.

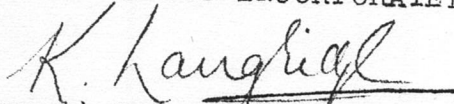

Baulk Ring Part No. P.116396 ---- 9 threads on cone face.

Current all-synchromesh gearboxes.

Baulk Ring Part No. 5220875 @--- 12 threads on cone face.

Please inform both Parts and Service personnel under your control and in your Dealers' premises of this advice.
