

GEARBOX AND
OVERDRIVE

No. E-13

SEPT. 1965

TO: ALL ROOTES GROUP DEALERS
MODEL: ALL MODELS.
SUBJECT: BORG WARNER AUTOMATIC TRANSMISSION.

From approximately January 1964 the colour of transmission fluid used in all Borg Warner Automatic units fitted in cars leaving the Factory has been brown.

As you are aware, our recommendation is to use Shell Donax T.6 which is coloured red. This recommendation still applies and we would confirm that it is quite in order for both fluids to be mixed during any topping up operations.

Please advise your Parts Manager of this information.
