

GEARBOX AND
OVERDRIVE

No. E-14

SEPT. 1965

TO: ALL ROOTES GROUP DEALERS
MODEL: SUPER SNIPE 11 - V AND IMPERIAL
SUBJECT: BORG WARNER DG AUTOMATIC TRANSMISSION.

From first production Series V Snipe and Imperial, certain improvements have been made to the torque convertor and transmission unit to provide a smoother change from intermediate to direct drive.

The new convertor unit, Part No. 1235215, has an improved direct drive clutch plate facing. This new convertor, which is identified by the letter 'P' stamped immediately after the Serial Number, supersedes the earlier type and can be used on all Super Snipe Series 11, 111 and IV models.

The new transmission unit, Part No. 1235216, incorporates a change in the convertor shuttle valve which gives an increase in convertor pressure in intermediate and direct drive. This can also be identified by the letter 'P' stamped immediately after the Serial Number.

NOTE: THE LATEST TRANSMISSION UNIT, 1235216, CAN ONLY BE USED ON SERIES V SUPER SNIPE AND IMPERIAL AND MUST ON NO ACCOUNT BE USED WITH THE EARLIER TYPE CONVERTOR UNIT 1207934.

Please advise your Parts Manager of this information.
