

TO: ALL ROOTES DEALERS
MODEL: HILLMAN, SUNBEAM & ALPINE
SUBJECT: ENGINE/TRANSMISSION HARSHNESS

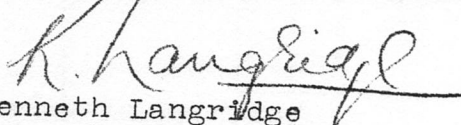

Should you be called upon to rectify a complaint of engine vibration and/or transmission harshness, etc., it is recommended that the following work is carried out prior to any further investigation:-

Remove the gearbox tunnel carpet and cover plate round the gear lever.

Check for any signs of a condition of foul between the gearbox top cover remote control and the floor tunnel.

Should such a condition exist, lightly lever the tunnel away from the cover, ensuring a clearance of approximately 1/2" (1.27 cm).
