MISCELLANEOUS  
TIRES  
HUMBER SUPER  
SNIPE

No. 273

November 29, 1961.

TO ALL ROOTES GROUP DEALERS

It is felt from time to time some dealers may receive inquiries from Humber owners who wish to fit Michelin X tires and although there is no intention of specifying this type on the Humber, we think some guidance should be given regarding the actual type of Michelin X which should be fitted if an owner insists on having them.

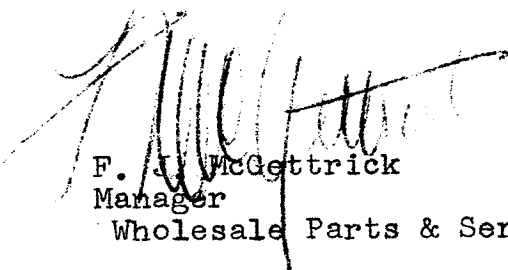

Two sizes of Michelin X tires are available that will fit the Super Snipe wheel, a normal 670 x 15 and a metric size of 185 x 15, and it is essential that the 670 x 15 tire is not used. This is extremely important in the case of power assisted steering cars.

Whilst the responsibility for fitting Michelin X tires is purely one between the customer and the garage, Dealers should suggest the 185 x 15 size X tire be used if the customer insists on fitting Michelin X tires.

Kindly bring the above to the attention of all concerned.
