TO ALL ROOTES GROUP DEALERS

TONNEAU COVER - SUNBEAM ALPINE

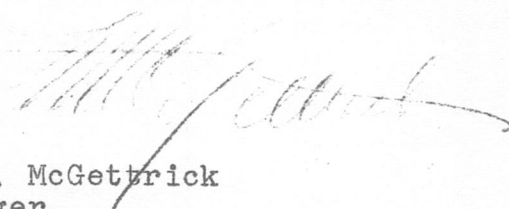

A few instances have been brought to our attention where it is felt the tonneau cover as supplied appears to be too short and as such makes installation to our vehicles in some cases very difficult.

It must be remembered that the vinyl plastic cloth changes with ambient temperature changes and certainly it is anticipated that to keep a decently fitted tonneau in place certain stretching is unavoidable.

In cases where such stretching will not facilitate relatively easy installation it is suggested that Dealers modify these by having a gusset installed locally to allow for the steering wheel protrusion which will then relieve the tonneau cover sufficiently to facilitate easy installation.

Kindly bring this to the attention of all concerned.
