

TO: ALL ROOTES DEALERS  
MODEL: ALL MODELS EXCEPT SUNBEAM IMP  
SUBJECT: GEARBOX LUBRICANTS

With the introduction of the new all synchromesh gearbox on all models other than the Imp, it is essential that only Shell X.100 Multigrade 10W30 oil is used or its equivalent in alternative brand.

It has been agreed that 10W30 Multigrade oil can be used to advantage on the earlier Light Car Range gearboxes, but on no account should it be used in the Imp Transmission.

Lubricant capacities of the new gearboxes are as follows:-

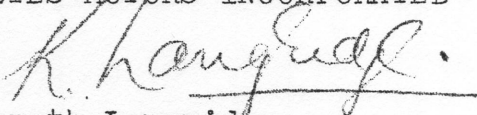

Standard Transmission

Hillman, Sunbeam DeLuxe, Husky  
and Alpine 4 Pints (American)

Overdrive Transmission

Alpine 5½ Pints (American)

ROOTES MOTORS INCORPORATED
