TIRES & WHEELS

No.

ISSUE 6

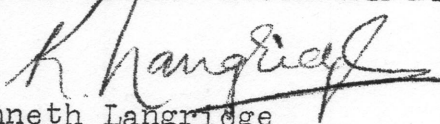

FEBRUARY, 1965

TO: ALL ROOTES DEALERS  
MODEL: SUNBEAM TIGER  
SUBJECT: ROAD WHEELS

It must be appreciated that racing does impose serious stress loads on the road wheels of automobiles especially in view of the fact that usually, tire sections are increased by at least 30% when racing.

The standard road wheels fitted to the Sunbeam Tiger are perfectly satisfactory for the very high speeds that this car is capable of producing. However, the road wheels are NOT suitable for racing and if dealers are interested in 'B' Production competition road wheels capable of taking the larger tire sizes necessary in this type of competition, must be obtained. Light alloy wheels suitable for competition, are available from our Parts Location in New York and Los Angeles.
